CONTENTS

Vol. XL, Issue Nos. 136–137

Journal of Polymer Science

Issue No. 136, October

J. I. Cunneen, G. M. C. Higgins, and W. F. Watson: *cis-trans* Isomerization in Polyisoprenes. Part V. The Isomerization of Natural Rubber, Gutta-Percha, Squalene, *cis-* and *trans*-3-Methylpent-2-ene, and *cis*-Polybutadiene, and Its Quantitative Estimation 1

A. I. Medalia, H. H. Freedman, and Sisir Sinha: Polysoaps. III. Polysoaps and Related Materials Prepared by Chemical Modification of Polystyrene 15

Alfred R. Gilbert and Simon W. Kantor: Transient Catalysts for the Polymerization of Organosiloxanes 35

Samuel H. Maron and Nobuyuki Nakajima: A Theory of the Thermodynamic Behavior of Nonelectrolyte Solutions. II. Application to the System Rubber-Benzene 59

Arthur V. Tobolsky and Charles E. Rogers: Isoprene Polymerization by Organometallic Compounds. II 73

Z. Alexandrowicz: The Correlation between Activities of Polyelectrolytes, Measured by the Light-Scattering and Osmotic Methods 91

Z. Alexandrowicz: Light-Scattering Measurement of the Osmotic Activity of a Polyethylene Glycol Solution 107

Z. Alexandrowicz: The Concentration Osmometer 113

E. A. DiMarzio and J. H. Gibbs: Glass Temperature of Copolymers. 121

Katsuhiko Ito: Relationship between the Flow of Polymeric Substances in a Parallel Plate Compression Rheometer and in an Extrusion Rheometer 133

Albert Zilkha, Nissim Calderon, Ariel Ottolenghi, and Max Frankel: Studies on the Low Pressure Polymerization of Propylene Using Catalysts Containing Alkali Metal Alkyls 149

A. S. Kenyon, R. C. Gross, and A. L. Wurstner: Kinetics of Spherulite and Crystallite Growth in Isotactic Polystyrene 159

A. M. Liquori, F. Ascoli, C. Botré, V. Crescenzi, and A. Mele: On the Electrostatic Interactions between Counterions and Macroions in Polyelectrolyte Solutions 169

C. G. Overberger and J. J. Godfrey: The Sulfinic Acid-Initiated Polymerization of Methyl Methacrylate 179

W. De Loecker and G. Smets: Hydrolysis of Methacrylic Acid–Methyl Methacrylate Copolymers 203

G. Smets and A. M. Hesbain: Hydrolysis of Polyacrylamide and Acrylic Acid–Acrylamide Copolymers 217

E. Goethals and G. Smets: Polymers and Group Interaction. VIII. Synthesis of a Styrene–Amino Acid Copolymer 227
Junji Furukawa, Teiji Tsuruta, and Shigeo Shiotani: Catalytic Reactivity of Organometallic Compounds for Olefin Polymerization. II. Vinyl Chloride Polymerization Catalyzed by Binary Systems Involving Organometallic Compounds 237
Mansel Davies: The Additivity of Some Energy Factors in Normal Alkyl Compounds 247
Nishio Hirai: The Viscosities of Concentrated Polymer Solutions. II. Extremely Concentrated Solutions 255

LETTERS TO THE EDITORS

Walter D. Niegisch: The Nucleation of Polyethylene Spherulites by Single Crystals 263
Alphonse Plaza and Richard S. Stein: The Scattering of Light from Polyethylene Films at Low Angles 267
Herbert K. Reimschuessel, Alan M. Lovelace, and Edward M. Hagerman: Linear Polymers Containing the 1,3,5-Triazine Nucleus 270
Eli M. Pearce: Reaction of Organotin Dihydrides with Divinyl Sulfone 273

NOTE

B. Saville: Interchange between Dialkyldithiocarbamates and Tetraalkylthiuram Disulfides 275

BOOK REVIEWS

Polymers and Resins. Their Chemistry and Chemical Engineering, Brage Golding. Reviewed by A. K. Schmidt 277

SUBJECT INDEX, VOLUME XL

Acrylamide, copolymers with acrylic acid, hydrolysis, 217
Acrylic acid, copolymers with acrylamide, hydrolysis, 217
Alkali metal alkyls, as catalysts for low pressure polymerization of propylene, 149
Alkyl compounds, additivity of energy factors in, 247
Amino acid, copolymer with styrene, 227
Anion exchange, 563
Benzene, thermodynamic behavior with rubber, 59
Carbon disulfide-insoluble sulfur, structure, 583
Catalysts, for low pressure polymerization of propylene, 149
Ziegler-type, for polymerization of β-pinene, 551
organometallic compounds, for olefin polymerization, 237
transient, for organosiloxanes, 35
Copolymerization, resonance and electrical factors affecting, 457
Crystalline behavior, polyesters, 521
Dead-end polymerization, with redox initiators, 557
Dialkyldithiocarbamates, interchange with tetraalkylthiuram disulfides, 275
Dicyclopentadienyliron, potentiometric titration, 433
Diene polymers, microstructure, 583
Diffusion, anion exchange resins and quaternary amine solutions, 563
Divinyl sulfone, reaction with organotin dihydrides, 273
Electron exchange polymers, 433
Epihalohydrin, crystalline, polymers and copolymers, 571
Glass temperature, copolymers, 121
Gutta-percha, isomerization, 1
Homopolymerization, *p*-trimethylsilylstyrene, 577
Hydrolysis, acrylic acid-acrylamide copolymers, 217
methacrylic acid-methyl methacrylate copolymers, 203
polyacrylamide, 217
Initiators, redox, and dead-end polymerization, 557
sulfinic acid for methyl methacrylate polymerization, 179
Isoprene, polymerization with organometallic compounds, 73
Kinetics, spherulite and crystallite growth in isotactic polystyrene, 159
Linear polymers, with 1,3,5-triazine nucleus, 270
Light scattering, for measurement of osmotic activity of polyethylene glycol, 107
for measurement of polyelectrolyte activities, 91
polyethylene, 267
and second virial coefficient, 537
Light-scattering cell, for angular measurements, 573
Melting properties, polyesters, 521
Methacrylic acid, copolymers with methyl methacrylate, hydrolysis, 203
Methyl methacrylate, copolymers with methacrylic acid, hydrolysis, 203
sulfinic acid-initiated polymerization, 179
cis- and *trans*-3-Methylpent-2-ene, isomerization, 1
Molecular weight distribution, polystyrene, 469
Nonelectrolyte solutions, thermodynamic behavior, 59
Olefin polymerization, organometallic compounds as catalysts for, 237
Organometallic compounds, as catalysts for olefin polymerization, 237
for isoprene polymerization, 73
Organosiloxanes, transient catalysts for, 35
Organotin dihydrides, reaction with divinyl sulfone, 273
Osmometer, concentration, 113
Osmosis, for measurement of polyelectrolyte activities, 91
Osmotic activity, of polyethylene glycol, measurement by light scattering, 107
β-Pinene, polymerization with Ziegler-type catalysts, 551
Polyacrylamide, hydrolysis, 217
Polyamides, 329, 359
cis-Polybutadiene, isomerization, 1
Polycondensation, interfacial, 289, 299, 239, 337, 343, 359, 367, 377, 389, 399, 407
Polyelectrolytes, activities measured by light scattering and osmosis, 91
electrostatic interactions in, 169
Polyesters, crystalline behavior and melting properties, 521
Polyethylene, light scattering, 267
nucleation of spherulites, 263
single crystal and bulk material behavior, 565
Polyethylene glycol, osmotic activity measurement, 107
Polyisoprene, *cis-trans* isomerization, 1
Polyphenyl esters, 399
Polyphthalamides, 337
Propylene, low pressure polymerization, 149
Polysoaps, by chemical modification of polystyrene, 15
Polystyrene, isotactic, kinetics of spherulite and crystallite growth, 159
molecular weight distribution, 469

Polystyrene (*continued*)
monodisperse, maximum relaxation time for, 443
polysoaps from, 15
Polysulfonamides, 389
Polyterephthalamides, 343
Polyurethanes, 367
Polyvinyl chloride, mechanism of stabilization, 419
Redox initiators, and dead-end polymerization, 557
Relaxation time, monodisperse polystyrene, 443
Resonance, and copolymerization, 457
Rheometers, comparison of parallel plate compression and extrusion types, 133
Rubbers, natural, isomerization, 1
thermodynamic behavior with benzene, 59
Second virial coefficient, determination by light scattering, 537
Squalene, isomerization, 1
Stereospecific polymerization, 533
helical, 569
Structure, noncrystalline polymer, 578
Styrene, copolymers with amino acid, 227
Sulfinic acid, as initiator for methyl methacrylate polymerization, 179
Tetraalkylthiuran disulfides, interchange with dialkyldithiocarbamates, 275
Thermodynamics, nonelectrolyte solutions, 59
p-Trimethylsilylstyrene, homopolymerization, 577
Turbidimetric titration, for molecular weight distribution of polystyrene, 469
Vinyl chloride, polymerization using organometallic compounds, 237
Vinyl compounds, molecular orbital considerations of reactivities, 487, 499, 511
Viscosity, concentrated polymer solutions, 255
Ziegler-type catalysts, for polymerization of β-pinene, 551
